30 NOVEMBER 2008

The Company's investment objective is to achieve long term capital growth by investing in high growth, development stage biotechnology companies that are either quoted or unquoted. IBT invests in shares of companies that are considered good value with experienced management and strong potential upside through the development and/or commercialisation of a product, device or enabling technology.

Fund Manager's November Market Review

In November, the Nasdaq Biotechnology index was down 4.1%, and the Russell 2000 Growth Biotechnology Index (focused on small and mid capitalisation stocks) closed down 6.8%, underperforming the S&P500 which was down 3.3% (all in Sterling terms). IBT's NAV decreased by 2.2% and the market share price by 6.5%.

The short rally for equities into the US election in early November reversed course dramatically through the remainder of the month as the US automotive industry faced bankruptcy, and the US Treasury abandoned components of its \$700bn financial services industry rescue package. Sterling further weakened against the dollar on negative outlook statements on the UK economy from the Bank of England.

The global biotechnology sector acted in sympathy with broader markets. This was despite strong third quarter financial results for the majority of the later-stage profitable companies, highlighting again the defensive growth characteristics of the industry. Smaller-cap biotech shares weakened further as investors continued to reduce exposure to illiquid stocks and high risk early-stage companies.

Clinical and regulatory news flow during the month was on balance negative with several widely-held mid-cap biotech companies suffering setbacks, which did nothing to help investor's perception of the sector's risk profile. In addition, concerns over Roche's ability to finance the \$45bn acquisition of Genentech kept potential investors in the sector on the sidelines.

As at 30th November 2008

Share Price	111.5p

INVESTMENT MANAGER

SV Life Sciences Managers LLP was appointed Manager of IBT on 1 January 2005. Between November 2000 and December 2004, Schroder Ventures Life Sciences as the SV Life Sciences business was then known, was Adviser to the Manager of IBT during that period, Schroder Investment Management Ltd.

SV Life Sciences is a venture capital adviser and manager that makes selected investments in entrepreneurs and management teams.

SV Life Sciences provides finance to businesses at all stages of development and across the human life sciences sector. These sectors range from biotechnology & pharmaceuticals to medical devices & instruments, to healthcare information technology and services. SV Life Sciences currently advises or manages five funds with capital commitments of approximately \$1.6 billion which primarily invest amounts of between \$1m and \$20m in North America and Europe, but will consider innovative investments in other regions. Our team of 34 professionals has a diverse, complimentary set of skills and experience that allow us to tailor a team to work with almost any life sciences business.

SV Life Sciences is a trading name of SV Life Sciences Managers LLP, which is Authorised and Regulated by the Financial Services Authority.

Nothing in this document represents investment advice and is therefore not a recommendation to buy or sell shares. The value of investments, and the income from them, may go down as well as up, and is not guaranteed, and investors may not get back the full amount invested. Exchange rate changes may cause the value of overseas investments to rise or fall.

Investors should bear in mind that investment in biotechnology shares can be subject to risks not normally associated with more developed markets or stocks. Investing in the biotechnology sector carries some particular risks and investment in IBT should be regarded both as long term and as carrying a high level of financial risk.

In addition, there is no guarantee that the market price of shares in investment trusts will fully reflect their underlying net asset value and it is not uncommon for the market price of such shares to trade at a substantial discount to their net asset value.

The Schroder ISA is a non CAT standard ISA. Schroder Investment Management Ltd and SV Life Sciences Managers LLP are Authorised and Regulated by the Financial Services Authority.
